

Printing Individual Containers

- 1) Open your digital NFT in your preferred photo editing program.
- 2) Change the image's zoom level To Fit your screen.
- 3) Use the Rectangle Mask Tool to mask one of the square containers.

- 4) Copy the masked square and then Paste it as a New Image from the clipboard.
- 5) Resize the image to fit on a standard 8 ½ x 11 piece of paper. You can resample the image to 100 dpi if you like.
- 6) Print the image to read the lettering as described in the sighting-the-letters.pdf file. Follow the same procedure with each container featuring linear graphic lettering.
- 7) You may want to write the Container number on the back of the page for future reference.
